

Emergency Equipment Funded by SSE Resilient Communities Funds

The Parish Council have now received all the equipment that we bid for as part of our resilience project.

The 4th community defibrillator is installed and operational at West Stowell Farm Office and listed with South West Ambulance Trust for access via 999 calls. So far it has not been accessed.

The emergency equipment which includes a generator, hi vis jackets, first aid, shovels, grit spreader and wind up torches and radio are all stored and ready for use.

Once again the Parish Council would like to thank SSE for enabling us to be prepared for emergencies and provide more equipment our designated refuge centres.

Cllr Dawn Wilson
